

Diversity of workplaces and spaces in cities

11-12 September 2017

University of Southampton, Highfield Campus, Building 44, Lecture Theatre A 1041

This seminar investigates how working spaces and places in cities are changing and what this means for urban systems in terms of infrastructure, urban design and planning. Key questions to be examined include:

- How diverse are the working spaces and places of workers in cities?
- How are working spaces transformed into workplaces?
- Where is formal/informal/precarious work undertaken; in what urban sites and places, and what spaces do these create?
- Are new hybrid places emerging in cities? How regulated/formalized are these?
- How do we have to rethink 'the journey to work', formal vs. informal work(spaces), private vs. public spaces and corporate vs. social spaces in cities?

Registration and abstracts:
